How to Use the SmartGuide App

Taking Photos for Navigation

- All location photos must be taken in horizontal (landscape) mode.

- This ensures accurate recognition and smooth direction guidance.

- Portrait (vertical) images are not supported for navigation.

Adding a Campus (Users)

- Users can request to add a new campus by filling out a short form.

- The request is sent to the admin for approval.

- Only after the admin accepts the request, the campus will be visible in the app.

Admin Notifications

- Admins receive real-time notifications whenever a new campus is requested.

- Admins can:

  - Accept or reject campus requests

  - Edit campus info and popular places

  - Delete campuses or users

  - Manage users and control access

Adding Places (Users)

- Once a campus is approved, users can:

  - Add key places of interest (e.g., cafeteria, lecture halls, offices).

  - Mark the most visited/popular places to help new visitors.

- These places are used to guide visitors through the smart camera navigation.

Support & Feedback

- Tap the Support button to send us feedback or questions.

- It opens your email app with our contact address pre-filled.

- We appreciate any feedback to improve your experience!

Permissions Reminder

- Allow camera access (for photo navigation)

- Have an internet connection (for real-time data)

- Log in with your Android device (uses Android ID)
